

Vision Dental Website Proposal

06.10.2025

PROJECT OVERVIEW

Vision Dental is investing in a full redesign and development of its website presence to elevate its brand and improve the user experience for patients. This project includes the creation of two websites—one for the primary location and a second site with tailored content for an additional location. The new sites will be clean, modern, mobile-responsive, and optimized for search engines. Our approach integrates content strategy, SEO, UX/UI design, and development using a scalable CMS such as Framer or Webflow.

The 7Seas team will handle all aspects of this process, including content architecture, wireframing, visual design, development, QA, and deployment. Our focus is on building a website that differentiates Vision Dental from competitors, drives new patient conversions, and ensures long-term maintainability.

GOALS

- Establish a modern, professional online presence that reflects the quality of care provided by Vision Dental.
- Differentiate Vision Dental from local competitors through superior design and functionality.
- Drive new patient inquiries through clear calls-to-action and optimized user journeys.
- Ensure both websites are fast, mobile-friendly, and SEO-optimized.
- Enable easy content updates through a scalable and intuitive CMS.

PROJECT UNDERSTANDING & OBJECTIVES

Key Objectives

1. **Modern & Clean Aesthetic:** A fresh visual design that clearly sets Vision Dental apart from competitors.
2. **User Engagement & Conversions:** Clear, intuitive calls-to-action guiding visitors to become new patients.
3. **Improved Performance & SEO:** Faster load times, mobile-responsive layouts, and basic on-page SEO best practices.
4. **Content Management:** A user-friendly CMS (Webflow or WordPress + ACF).

5. **Multi-Site Strategy:** Build and deploy two websites — a primary site and a location-specific variant with alternate content.

High-Level Deliverables

- Basic SEO research
 - Proposed content & text
 - Sitemap & information architecture
 - Low-fidelity wireframes
 - High-fidelity design mockups & prototype
 - Fully developed, responsive websites for both locations
 - CMS setup for easy content editing
 - Stock photography from our licensed subscriptions
 - QA, performance tuning & go-live support
 - CMS training and support documentation
-

SCOPE OF WORK & APPROACH

Phase 1 – Discovery & Research

- Kick-Off Workshop
- Competitive Analysis
- Content & Technical Audit
- Design Direction & Moodboard
- Sitemap

Phase 2 – Content Structure & Wireframing

- Finalize Sitemap
- Stakeholder Review & Revisions

Phase 3 – Visual Design & Prototyping

- High-Fidelity Mockups
- Design Reviews & Revisions

Phase 4 – Front-End Dev & CMS Integration

- Technology Setup (Webflow or WordPress)
- Global Styles & Component Library
- Template Development (Home, Services, About, etc.)
- Responsive QA & Browser Testing
- Accessibility & Performance Optimization

Phase 5 – Content Migration & SEO

- Content Audit & Migration Plan
- Content Import & Optimization
- On-Page SEO Implementation
- 301 Redirect Setup

Phase 6 – QA, Testing & Launch

- End-User Testing
- Final QA Sweep
- Performance Audit
- DNS Cutover & Go-Live

Phase 7 – Training & Documentation

- Admin Training Session
- CMS User Manual

PROJECT TIMELINE & MILESTONES

Phase	Duration	Milestone
Discovery & Research	2 weeks	Discovery Report & Sitemap Delivered
Wireframing	2 weeks	Wireframes & IA Approved
Visual Design & Prototyping	3 weeks	Design & Prototype Sign-Off
Dev & CMS Integration	4 weeks	Staging Site Fully Built
Content Migration & SEO	2 weeks	Content Live & SEO Configured
QA, Testing & Launch	1 week	Go-Live & Verification
Training & Documentation	1 week	Training & User Manual Delivered

Total Duration: 12 weeks
